Another Simple Option

• Old Summary and Settled Tab Location, Keep Same Location

• Make Summary Tab Saperate

• Make Settled Tab Saperate

Concentrate now

- Make First Tab Dashboard, (which will be static, and it will run a Web Page URL.
- Currently It will say Welcome to Deal Manager Terminal. etc etc
- Old Summary and Settled Tab Location, Keep Same Location
- Make Summary Tab Saperate
- Make Settled Tab Saperate

LOADING DATA Means you make iFRAME, We will give WEBSITE URL, First It Show Loading Data, and as soon as Website is reached it will show whatever we add on website, We will Add Nextgen Logo and User Documentation for help etc,

99.9% Load Cut at first login

Concentrate now

After browsing from Dashboard to Summary,

User will see only summary tab now (No Settled)

When Browsing from summary to settled user will see only settled Tab now (when Settled tab is opened, Load Cut at summary Tab

When Summary tab is open then load Cut at Settled Tab (but it keeps updating every 30 seconds even if its not opened) in order to remain proper

but any tab user click, it immidietly starts working live / Real Data.

this idea is to hide alot of data incomming which makes terminal heavy.

when he click Settled

then he see selttled trades tab

which was already in old design where on left side we had summary and on right side we had settled showing both live

now this design will be fast user experience/
